Empathy Map Canvas:

The Gemini Historical Artifact Empathy Map focuses on understanding the needs, experiences, and motivations of historians, researchers, archivists, and space enthusiasts who interact with artifacts from the Gemini space program. These individuals are deeply committed to preserving and documenting important spacecraft components, mission records, photographs, and astronaut equipment that represent a crucial phase in space exploration history.

Empathy Map Canvas

Gemini Historical Artifact Empathy Map

The Gemini program (1965-1966) was critical in advancing NASA's capabilities in spaceflight and paving the way for the Apollo missions. Historical artifacts and documents from this era are invaluable resources that capture the essence of five Gemini missions, providing insights into early space exploration. This empathy map explores incisive, feelings, thoughts, and behaviors of those who interact with these historical artifacts including researchers, historians, educators, and space enthusiasts. In the era.

Gemini Historical Artifact Empathy Map

WHO are we empathizing with?
The people who can tell us about the Gemini program and its impact on the Apollo missions.

WHAT do they want to achieve?
Understand what their goals are for interacting with the artifacts.

HOW do they feel?
Curious, excited, interested, fascinated, and overwhelmed.

WHAT do they need?
What do they need to succeed? What do they need to feel safe and comfortable?

WHAT do they see?
What do they see in the artifacts? What do they see in the environment around them?

WHAT do they hear?
What do they hear from others? What do they hear in their own minds?

WHAT do they taste?
What do they taste in the artifacts? What do they taste in the environment around them?

GOAL:
To understand what the artifacts mean and bring them back to life.

FEAR:
That the artifacts will be destroyed or lost.

ANTICIPATION:
Anticipating getting back the artifacts.

RECOMMENDATION:
Educators, historians, and space enthusiasts should continue to study and learn from the artifacts.

IDEAS:
Create a museum exhibit featuring the artifacts.

NOTES:
Gemini artifacts are important for understanding the history of space exploration.
